

Secured Internet Surfing in Public Areas

The Endian Hotspot solution is a complete and flexible tool to manage Internet access for businesses and public areas users. Using Endian Hotspot organizations like hotels, libraries, schools, airports, banks and Internet cafés can provide easy and secure Web surfing to their users.

Choose the way your customers or users surf: time or traffic-based sessions with prepaid or postpaid tickets or even free access. Account management and real-time access log of your registered users. Check your customers' status, detailed list of movements and account balance.

Easy to use, Endian Hotspot gives you and your clients a no hassle solution to secure public area Internet surfing. Customize your hotspot home page and ticket receipts using an integrated smart editor through the Endian Web interface.

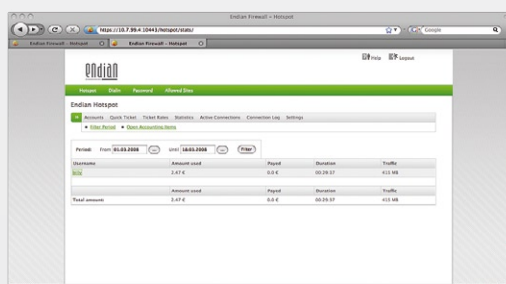

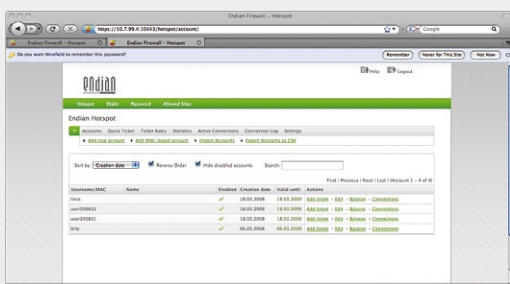

Connect wired and wireless desktops, laptops and Internet kiosks no matter which operating system they use.

With Endian SSL VPN Server and Endian Secure VPN Client, your company's internal wireless clients can communicate effortlessly and securely. Endian UTM's SSL VPN allows you to quickly and easily setup secure SSL encrypted connections between your internal wireless clients and your LAN, stopping wardriving and hackers from eavesdropping on your wireless communication. Endian Secure VPN client supports Windows, Linux and Mac OSX, so you can be sure no matter what OS environment, your clients are safe and secure.

Being integrated into Endian UTM, Endian Hotspot is the only solution that secures Web surfing without compromising performance. This means that your Endian Hotspot is protected with Web/mail security, anti-virus, anti-spam, and all the other great Endian security features.

Highlights

- **Account management** – manage the users that have Internet access
