

ALSO becomes Endian Distributor

Endian, the leader in open source UTM security solutions, is proud to announce an agreement with ALSO for the distribution of UTM appliances in Germany, starting July 2010.

Endian products have been selected by the leading IT company ALSO among other UTM network security solutions for their efficiency and state-of-the-art features: the agreement is an important result confirming the quality of Endian UTM solutions and supporting the strategy of business expansion into the German market.

Founded in 2002, Endian was the first company in the world to create a completely open source UTM appliance for the protection of enterprise networks: the first release of the public software dates back to 2005 and so far has been downloaded 650.000 times.

Today the Endian UTM Enterprise products protect the networks of more than 3500 customers in over 40 countries worldwide. Among the Endian satisfied users, there are worldwide known names such as Enel Erelis, Sava Senior Care, U.S. Aid, Hyundai, Siemens, Italian Public Administrations and Universities as well as several German institutions and Enterprise Companies such as University of Erlangen, Hamburger Sportverein/HSV, UEFA Cup Final 2010, Carl Zeiss eG.

ALSO is one of the leading European companies in the wholesale and logistics sector for information technology and consumer electronics (ICE). The company went public on Swiss Stock Exchange in 1986 and is currently active in 7 European countries.

Endian Offers

Endian UTM: the "all in one" solution for a complete protection of business networks (against attacks, viruses, spam and Internet threats), optimizing traffic flows and dramatically cutting the network management costs and time. Endian UTM is available in three versions:

1. **Hardware** – Provides a unified, comprehensive and powerful turn-key network security solution ("plug and play") for any sized network (ranging from 5 to 2500 users).
2. **Software** - Provides the same technology and user experience offered in the Endian UTM hardware, allowing customers to transform any PC into a complete security appliance. Endian UTM Software offers enhanced levels of flexibility in the Endian product line.
3. **Virtual** - Endian UTM Virtual appliance supports the most important hypervisors (VMware, Xen, KVM) and is officially certified as VMware ready.

All versions offer several important security services such as Network Security, High Availability (hardware redundancy), VPN (work anywhere and anytime), Web Security, Mail Security, Quality of Service (bandwidth management), Intrusion Prevention and Detection, and much more.

Founded in 2002, Endian was the first company in the world to create a completely open source UTM appliance for the protection of enterprise networks: the first release of the public software dates back to 2005 and so far has been downloaded 650.000 times.

Today the Endian UTM Enterprise products protect the networks of more than 3500 customers in over 40 countries worldwide, representing an "all in one" solution for the complete protection of business networks against attacks, viruses, spam and Internet threats, optimizing traffic flows and dramatically cutting the network management costs and time. Endian UTM is available in three versions: hardware, software and virtual.
