

Stay Connected, Even in Ocean Water

Make satellite connectivity effective

Satellite broadband is a critical asset for maritime business continuity. Since cruise ships, commercial vessels and offshore platforms simply don't have access to traditional Internet services, the limited bandwidth options they do have access to is that much more precious.

Not only is Satellite Internet particularly expensive, it's also a challenge to manage and as a result, thousands of companies are flushing money down the drain. Endian's ability to provide an easy bandwidth management solution allows maritime to get control over their network and distribute bandwidth based on the applications they deem a priority.

Benefits for the reseller

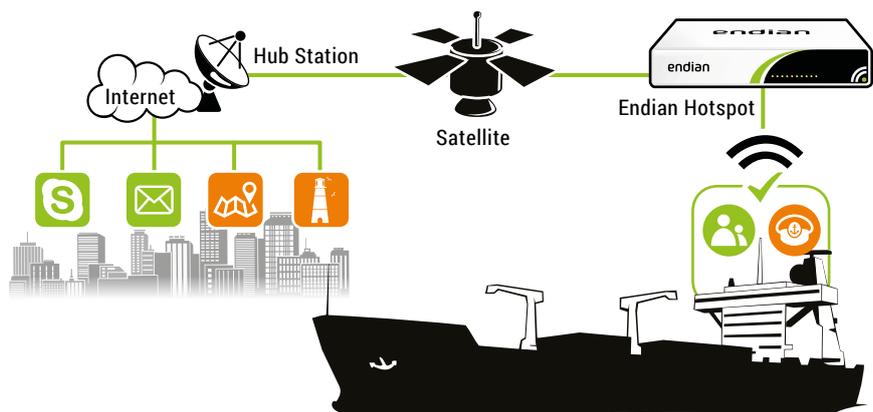

- ★ Straightforward pricing and product options
- ★ Easy set-up & configuration
- ★ Robust & highly stable software
- ★ Top tier technical support
- ★ Technical and sales training programs for all skill levels

Benefits for the Hotspot Manager

- ★ Manage multiple Internet uplinks
- ★ Allocate bandwidth based on application priority
- ★ Differentiate user access based on roles
- ★ Secure for both users and business

Recommended for

- 👍 Cruise ships
- 👍 Commercial vessels
- 👍 Offshore platforms

Endian Hotspot for Connecting and Protecting Ocean Vessels

Ensure the Highest Levels of Connectivity with Multiple Internet Services

Satellite Internet connection is often unstable and spotty, however, on-board applications that rely on it can be critical to operations. Endian helps organizations ensure the highest levels of Internet connectivity by allowing multiple WAN uplinks.

Separate the Guest and Corporate Networks

When the Internet connection is used both for working purposes and for leisure, it is necessary to separate the networks in order to avoid bandwidth saturation issues along with other potential security issues. Endian provides you with the ability to great network segmentation with ease!

Optimizing the Bandwidth Availability, Prioritizing Critical Applications

When heterogeneous devices and users share the same network on a potentially unstable Internet connection, managing bandwidth and prioritizing critical applications becomes of paramount importance. Endian makes this process simple!

Provide Easy and Secure Internet Access for Crew Members and the Vessel's Guests

Using SmartConnect, network administrators can provide a fully automated login process for crew members and guests by either SocialLogin (Facebook/Google+) or email verification.

Protect your Network

Secure your network against all external intrusions and monitor ingress and egress traffic through an easy-to-manage, full featured firewall

Endian Hotspot Hardware Comparison

	Hotspot 150	Hotspot 500	Hotspot 1500
Available Subscriptions (user)	up to 150	up to 500	up to 1,500
Throughput	250 Mbit/s	500 Mbit/s	3 Gbit/s
Concurrent Sessions	300,000	500,000	2,500,000
Case	Desktop	Rack 1U	Rack 1U
Dimensions	44mm x 232mm x 153mm	44mm x 430mm x 260mm	44mm x 430mm x 400mm
Weight	1.1 kg	5 kg	8 kg
Memory	1 GB	4 GB	8 GB
Storage	1x 320 GB HDD	2x 320 GB HDD Raid	2x 500 GB HDD Raid
Networking	4x Gigabit Ethernet	6x Gigabit Ethernet	8x Gigabit Ethernet
LAN Bypass	-	2 Pairs	4 Pairs
Power Supply	40W External	65W Internal	250W Internal
Cooling	Fans	Fans	Fans
LCD Display	-	Yes	Yes
