WiFi Check
"Great hotel, bad WiFi!"

Carla

23.June 2015
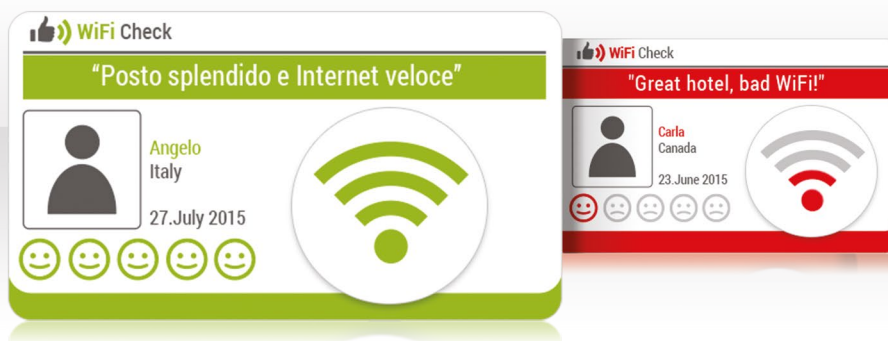

Let's face it, learning your hotel doesn't offer WiFi after you check in can be incredibly frustrating, especially if you're a business traveler. One study even found that an estimated 86% of commuters around the world believe WiFi is a minimum requirement for hotels and it influences their decision to stay.

But even those that do offer WiFi are risking negative online consumer reviews if they don't utilize equipment that can properly manage the wireless guest access. That's why more and more, hospitality is turning to Endian!
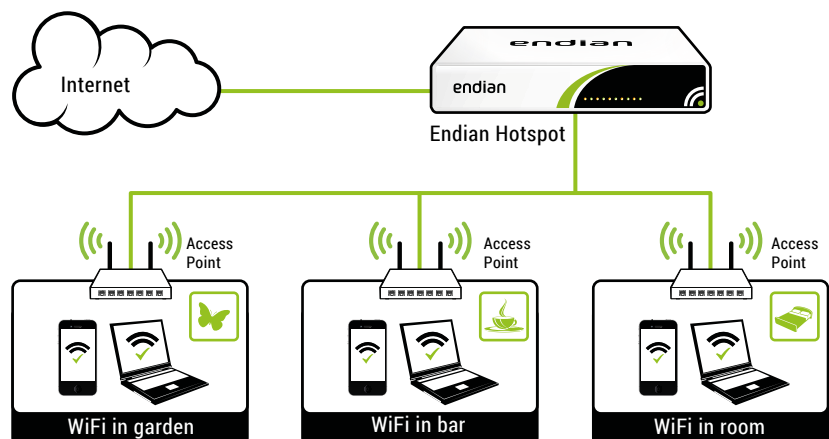

Benefit for the reseller

★ Straightforward pricing and product options
★ Easy set-up & configuration
★ Highly reliable hardware & services
★ Top tier technical support & resources
★ Technical and sales training programs for all skill levels

Benefits for the Hotspot Manager

★ Easy to manage with self-registration
★ Multiple user ticket types (paid/free, bandwidth, time, etc)
★ Advertising & ongoing communications
★ Secure for both user and business

Endian Hotspot for Hospitality

Offer secure Internet access for guests in every area of the hotel

Because commuters have become increasingly more reliant on Internet access, Hotels have widely adopted the service as a standard amenity for guests. Endian helps hotels turn standard WiFi into a fully automated captive portal to help secure the network, manage bandwidth & even generate revenue!

Supporting VoIP technology

VoIP technology represents significant reduction in cost over traditional telephony, not to mention a wide array of advanced features. Now you can manage it safely, in a separated network form the Hotspot's.

Digitizing Customers' Restaurant Orders

Thanks to Endian's multi-zone support, administrators can safely manage all the restaurant services. The guest and corporate LAN can be separated from one another which helps ensure that Internet-connected devices (Like PoS) are always accessible and secure!

Advertise Hotels Initiatives Within the Captive Portal

Having the ability to introduce hotel announcements and programs help to enhance the customer experience! Endian provides hotels with the capability to easily drop image or video advertisements on the Captive Portal before the user is directed to the landing page.

Centrally Manage All Users' Accounts

Because of Endian's new Hotspot management improvements, you can now have one administrative account for each guest while being presented with a single, universal bill. (e.g. room service, Internet service, restaurant).

Maintain Internet Access Logs and Comply with Regulations

Recording users' navigation data (while respecting privacy rules) can be very beneficial for indemnifying the hotel from responsibility should a user engage in illegal web activity on the guest network. Endian provides complete real-time and historical user activity reporting.
