

The best WiFi for private practices and business centers

Create extra value for your guests and visitors

Convention centers, business offices and pretty much anyone with a waiting room is looking to extend wireless Internet for its guests these days. However, not all companies have access to quality or affordable Internet services. As a result, users may get frustrated when trying to connect and business networks may suffer from saturation if not managed properly

Endian Hotspot provides all of the tools any company needs to easily set-up a fully automated and regulated wireless guest access portal, complete with self-registration, bandwidth management and network security.

Benefit for the reseller

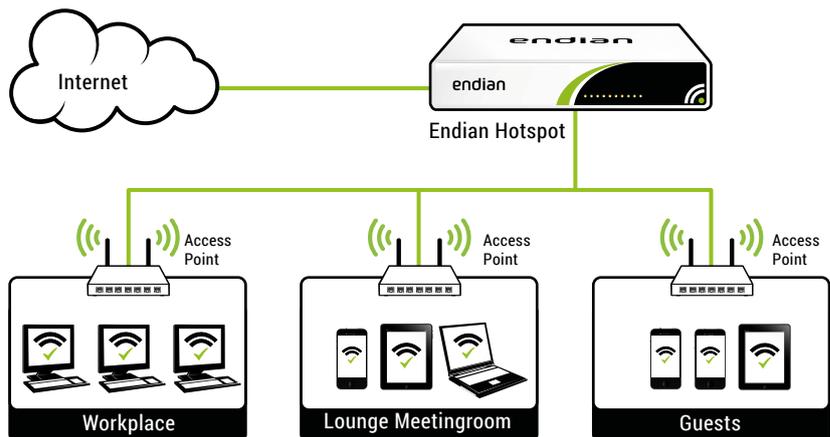

- ★ Straightforward pricing and product options
- ★ Easy set-up & configuration
- ★ Highly reliable hardware & services
- ★ Top tier technical support
- ★ Training programs available for all skill levels

Benefits for the Hotspot Manager

- ★ Multiple uplinks for additional bandwidth services
- ★ Protect business network bandwidth from saturation
- ★ Easy and quick user access
- ★ Multiple user ticket types (time, bandwidth, consumption)
- ★ Secure and audible browser history

Recommended for

- 👍 Convention centers
- 👍 Small offices and office spaces
- 👍 Waiting rooms
- 👍 Private practices

Endian Hotspot for Small Offices and Branch Locations

Provide Stable, Quick and Secure Internet Access for Staff and Visitors

Today, not many businesses can thrive without the Internet access. A smart management of this service let you differentiate collaborators' and visitors's navigation.

Restrict Access to Inappropriate Content

In order to save bandwidth, increase productivity and maintain a level of professionalism, it is important to be able to implement proper role-based restriction to the Internet. Endian helps companies achieve that with minimal effort.

Use Different Network Interfaces

Endian's ability to provide network segmentation lets you safely manage all of the various business applications safely. For example, being able to separate the Hotspot from the VoIP helps to protect the network from attacks and ensure quality to each service.

Integrate an Existing Database in the Hotspot's

This feature allows easy and complete integration with existing databases and helps providing Internet access without creating new users manually.

Record and Collect All Systems Logs

Being fully aware of what is and has happened on your network can be the key to solve legal issues, recover accidental mistakes or even removing potential bottlenecks in the network. Endian gives small businesses complete visibility over the network and access to historical user activity.

Safeguard Productivity

Now you can decide which applications can run in your network. You can set up rules to safeguard Internet bandwidth and employees productivity during working hours and leave more flexibility during breaks and lunchtime.
