

Endian Security Administrator Training

The introductory course to Endian solutions.

Providing a comprehensive overview of the management interface and all the features, ESAT course enables a 360-degree approach to Endian technology and perform installations of the various products in a very effective and independent way. **By achieving ESAT technical training, the reseller acquires the status of Endian Authorized Partner.**

Lesson Delivery and Participation

The course is online and structured for a duration of one working day. Active participation in all proposed activities and the assessment test is required. Successful completion of the test will result in the ESAT certification, required to enter the Authorized level of the partner program.
