

# Hospitality Relies on Hotspot

Do you really know what your customers expect?

**Must-have services**  
86% of international commuters surveyed believe wireless access is something hotels cannot miss.

A stable, secure and simple Internet connection is no longer a bonus, but a widely expected service. Hotel guests read 6-12 online reviews on average before booking and negative comments impact the decision more than positive reviews. Don't take the risk!

**"Awesome hotel, awful WiFi"**

**Carla**  
USA  
23.June 2015

The hotel was nice and the restaurant had a good selection, but the WiFi was awful! We couldn't even search for local attractions!

**"Very kind staff and high-speed WiFi!"**

**Angelo**  
Italy  
27.July 2015

We had a great vacation! The staff was friendly and having high-speed WiFi allowed the kids to watch movies while we rested.

**"No WiFi? Forget it for business trips!"**

**Brain**  
England  
30.July 2015

I've been traveling across Italy to visit my customers. I chose this hotel because of its location, but I felt totally disappointed when I realized it had no WiFi connection at all! Forget it for business trips!

**"Great coffee bar with a view (and Wifi)!"**

**Paolo**  
Italy  
02.May 2015

There's an impressive coffee bar in the lounge that overlooks a river. Because of the free WiFi, I must have posted 1000 pictures of it!
