

Connected everywhere

An entire network of public venues

One of the biggest challenges public venues have with providing wireless Internet access is over saturation of the network, especially with expansive coverage areas like stadiums and conference centers. The problem is the result of not being able to properly manage user access. When a public venue has a large crowd, for example, Internet providers find it difficult to guarantee quality service for everyone, which is why so many are coming to Endian for help!

Sports leagues are looking to deliver a complimentary mobile applications for an enhanced in-game experience, trade shows need to provide vendors Internet access, shopping centers want to advertise local businesses specials and all of this is possible with Endian's new dedicated series of Hotspot products.

Benefits for the reseller

- ★ Straightforward pricing and product options
- ★ Easy set-up & configuration

Recommended for

- 👍 Sports arenas
- 👍 Big libraries
- 👍 Stadiums
- 👍 Public squares
- 👍 Trade show facilities

Endian Hotspot for Public Venues

Provide Easy and Secure Internet Access for Any Device

In a crowded place, a large number of miscellaneous Internet-connected devices is to be expected. When the managing organization is able to provide easy and secure Internet access to any of them, the users' experience increases dramatically.

Create Different Internet Connection Options Based on Traffic

During the daytime, the flux of people that pass by a public place can be very different from night. With this in mind, it is to the venue's advantage to create different navigation tickets based on the bandwidth needs of those respective time slots.

Customize the Hotspot Captive Portal

All of us know the importance of a good first impression, and that is why immediately showing your available services and promotions provides a tremendous opportunity for both the business and consumer! Now you can use the Hotspot access portal to catch the users's attention and generate revenue.

Ensure Network Protection Through a Robust Stateful Firewall

In order to keep the network safe from intrusions and attacks, it is of critical importance to protect it with an effective product. The easier a product is to use, then the easier it is to use well, which is why Endian clients have some of the worlds most protected networks!

Collect Users' Access Data to Spread Effective Marketing Campaigns

Operating with the users' express consent, it is possible to leverage the Hotspot access data (email and/or telephone number) for marketing purposes, targeting them with tailored marketing campaigns for constant contact and brand development.
