

Endian Certified Security Expert

Unleash the Linux power in Endian with the upper level certification course

The ECSE is Endian’s highest level of professional certification, designed for Endian experts who want to enforce advanced settings, customs configurations and the most complex troubleshooting using built in and external tools to the curriculum.

The profile of the Endian Security Expert relies on proficiencies achieved in the ECSA level such as planning, implementing and basic troubleshooting network architectures using Endian products and is completed with the deepest knowledge of Endian architecture by real examples and best practices.

Special focus is put on the candidate’s ability to diagnose and repair Endian UTM installations through the command line as well as on the knowledge of the single services.

Update your ECSE Certification

The ECSE Update is a 4-hour online class that provides the necessary integration of knowledge and skills achieved through a certification course with the latest news on features, release and product enhancements. Furthermore during the ECSE Refresh Endian discloses the upcoming product development roadmap.

This Certification Update is the basic requirement for keeping the Primary partnership status as well as the associated benefits and must be refreshed upon every major release.

What you need: a computer running a virtual machine hypervisor (supported by Endian)

Primary Partner benefits

ECSE Certification is one of the enabling steps for you to become Endian Primary Partner.

The typical customer of a Primary Partner is a highly demanding business with large and complex deployments, that allow no downtime nor risks on their network. ECSE course provides your technicians with all the necessary tools to prevent and manage any threat proactively and effectively thanks to in-depth journey to the inner workings of Endian.

Besides an excellent know-how, Endian Primary Partner enjoys some exclusive benefits, such as:

- Top partner discount
- Access to development product roadmap in advance
- Technical resources and dedicated support
- Co-branded and co-funded marketing events

See all details in our Partner program: <http://www.endian.com/partner/program/>
