

Endian UTM Mini 10

The new generation of UTM hardware

The Mini 10 is the new entry level Endian UTM appliance. While conceived for small businesses and home offices, it fits perfectly into big projects as well.

The Mini 10 perfectly fits businesses with restricted staff, as this device offers all required security features at a really competitive price.

But the Endian Mini 10 is also ideal in big projects where, beside a principal centralized Unified Threat Management (UTM) appliance, smaller security gateways are needed to protect distributed facilities or critical machinery.
